Lesson 1: Conflict - the Plain Truth

What do you understand by the word conflict?

Here are some words that you might have thought of:

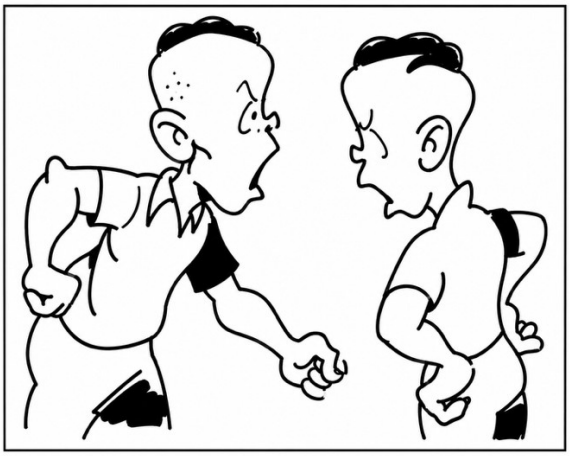
A fight	A battle
Strife	A quarrel

Conflict is natural.

Think about it. Not many people think the same way, like the same things, or react the same way in a particular situation. As different ideas, tasks and behaviours come into contact, conflicts can take place.

Conflicts happen everywhere.

Many can sometimes be solved easily; others grow into larger conflicts which might even result in physical harm or death.



Write a paragraph entitled "The World I Want To Live In."

As a peacemaker I learned
